Pitch deck

Objective

To analyze and visualize the current state process flow of a company's order fulfillment system and propose a future state process flow for optimization.

Our Current State

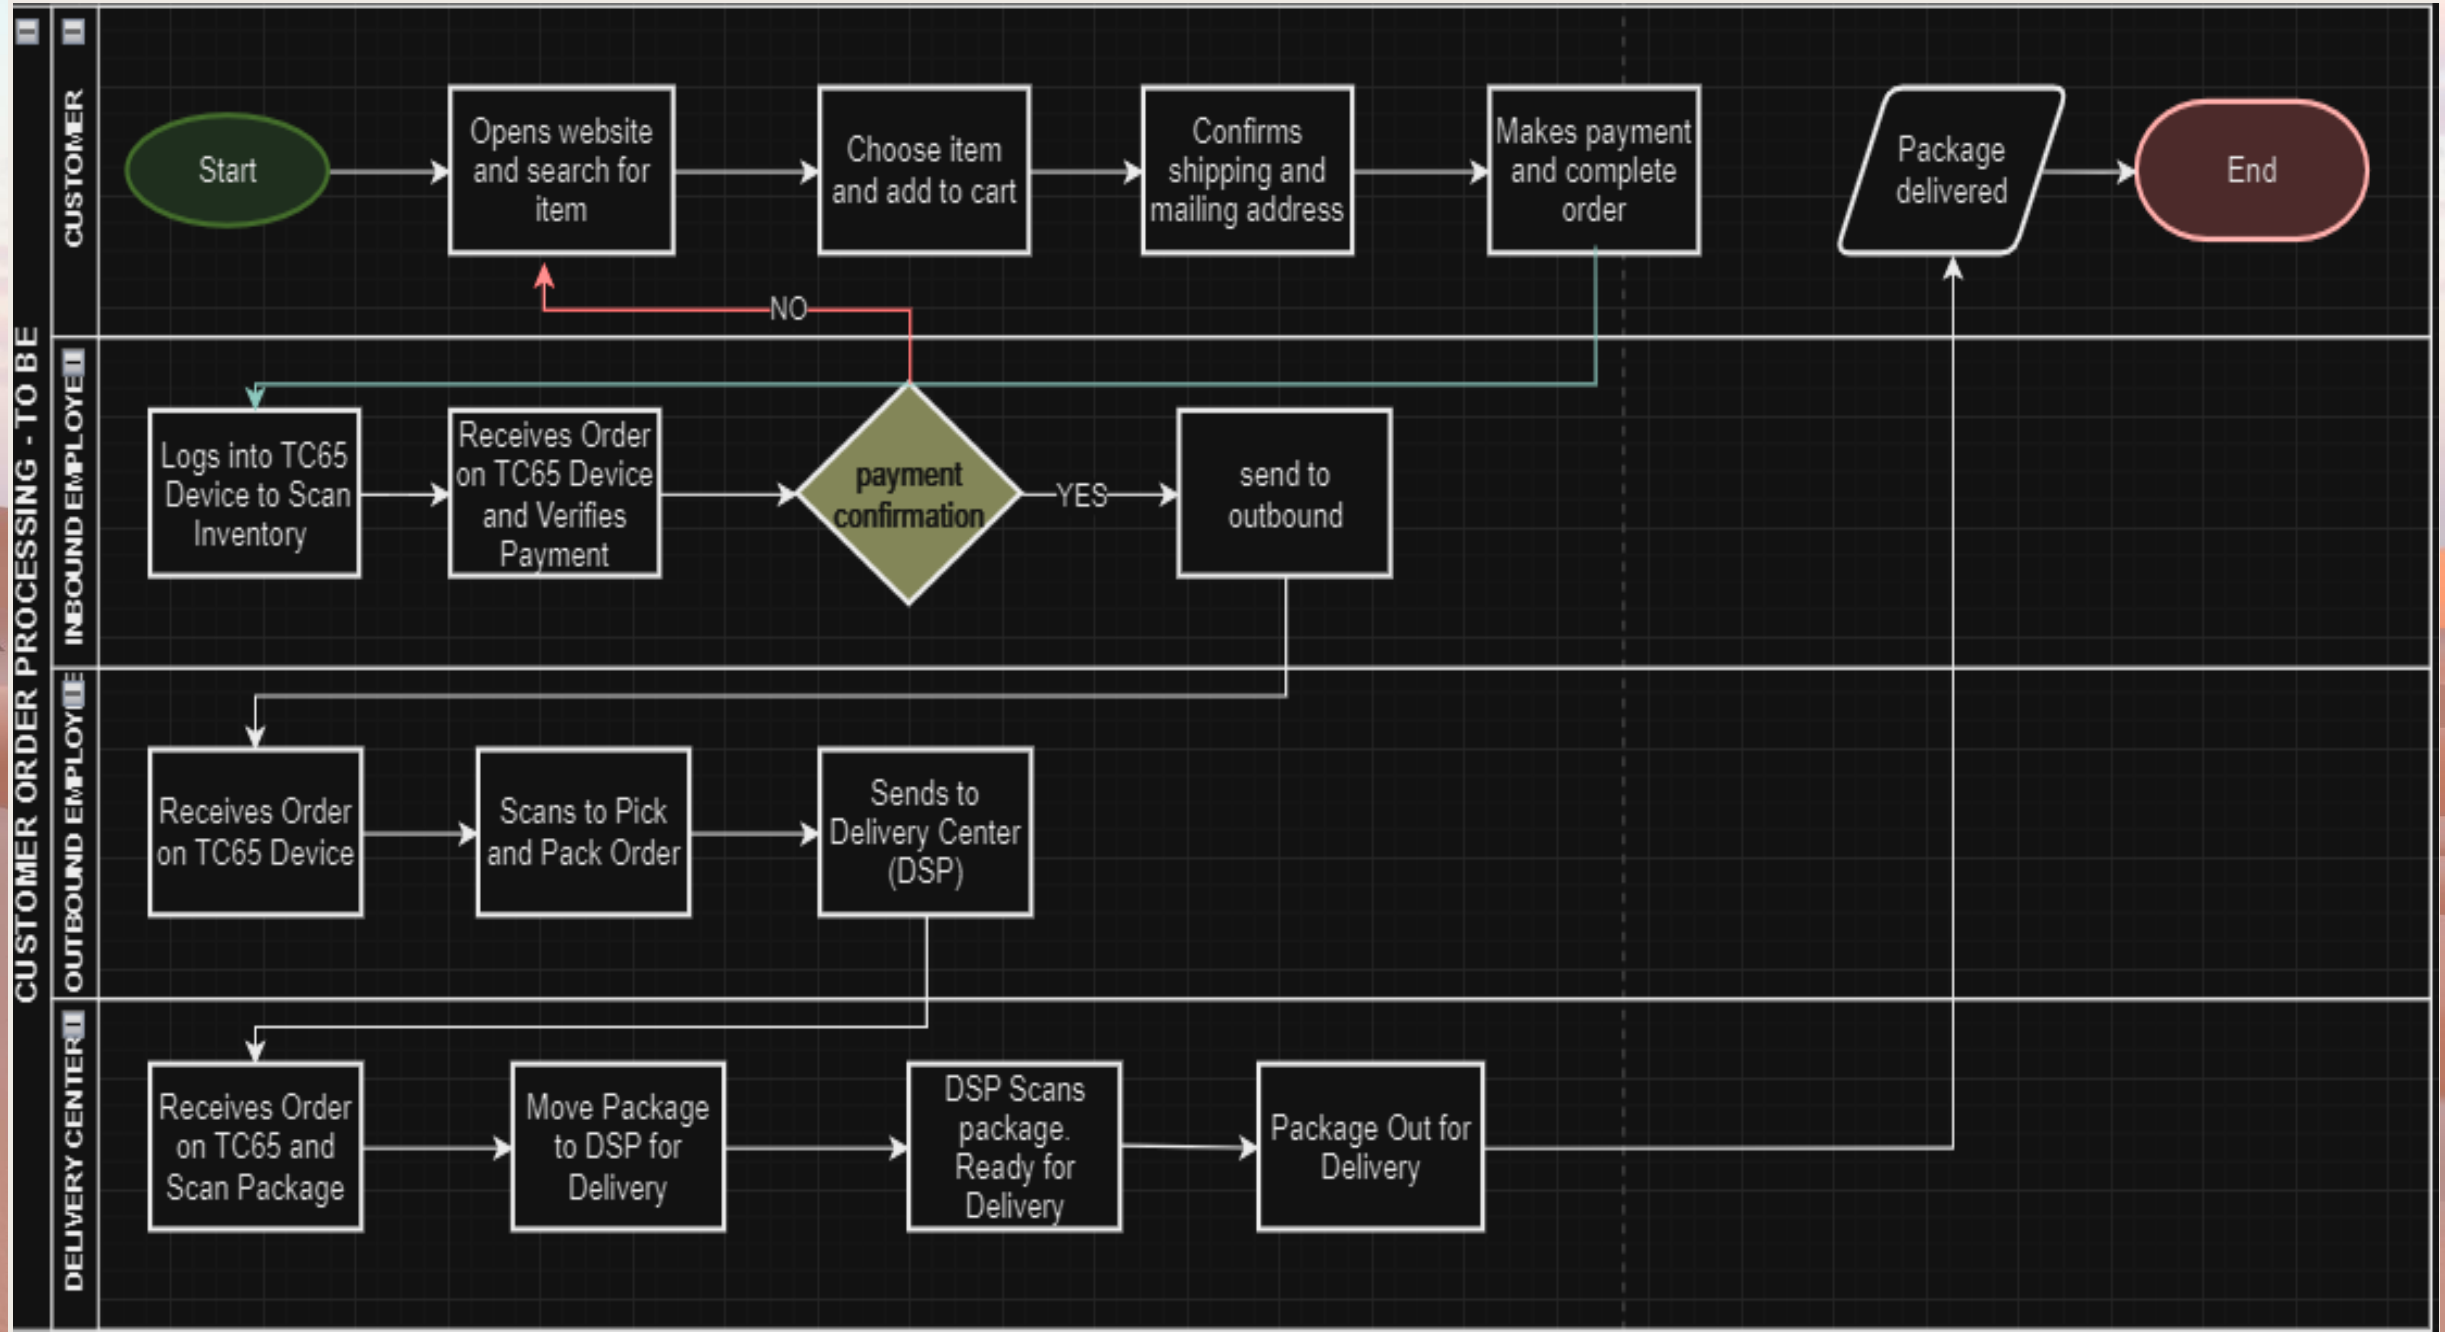

Pain Points

Pain Points

- Inventory is taken manually.
- Order tracking Accuracy by employee
- Package loss and delay by local delivery services

Our Future State

Rationale And Justification

Device Introduction

Introduction of TC65 for Inventory Scanning

Purpose: Ensure accurate inventory tracking and record-keeping.

Benefit: Seamless integration of inventory data into the system for better stock management and reduced errors.

Impact: Improved decision-making, timely replenishment, and minimized stockouts.

Implementation

Implementation of TC65 Devices for Employee Activities

Purpose: Streamline recording of customer and internal interactions.

Benefit: Standardized method for logging activities, aiding in comprehensive customer relationship management and internal transparency.

Impact: Enhanced customer service, tailored services based on historical interactions, and improved internal communication.

Delivery Service Personnel

Introduction of Dedicated Delivery Services

Purpose: Mitigate losses and delays in package deliveries.

Benefit: Greater control and oversight of the delivery process, ensuring safe and timely package delivery.

Impact: Improved customer satisfaction, reduced risk of package losses, and reliable service commitment.

Thank you
